If you test positive for COVID-19

**TAKE STEPS TO HELP PREVENT THE SPREAD OF COVID-19**

**STAY HOME.**
Do not leave your home, except to get medical care. Do not visit public areas.

**GET REST AND STAY HYDRATED.**
Take over-the-counter medicines, such as acetaminophen, to help you feel better.

**STAY IN TOUCH WITH YOUR DOCTOR.**

**SEPARATE YOURSELF FROM OTHER PEOPLE.**
As much as possible, stay in a specific room and away from other people and pets in your home.

---

If you test negative for COVID-19

- You probably were not infected at the time your sample was collected.
- However, that does not mean you will not get sick.
- It is possible that you were very early in your infection when your sample was collected and that you could test positive later.

---

A negative test result does not mean you won’t get sick later.
